## **DETAILED ACTION**

## Allowable Subject Matter

- 1. Claims 31-34 are allowable.
- 2. The following is a statement of reasons for the indication of allowable subject matter:

Claims 31-34 are allowable because the prior art, particularly Wohlfarth [U.S. Patent No. 6,232,759] does not apply, Gage et al. [U.S. Patent No. 6,188,253] and Mielke et al. [U.S. Patent No. 6,195,772] fail to teach or suggest a clocking apparatus for an electronic tester, comprising:

a second high speed clock generator coupled to a sequenced measure system for analog testing of the device under test, wherein the second high speed clock generator receives as an input the first clock from the fixed frequency clock generator and generates a fourth clock having a frequency that is a second multiple of a frequency of the first clock, wherein the fourth clock is supplied to the sequenced measure system.
